

GHE-01

Description

Greyhound is a software package for web based SCADA. It provides you with all the functionality of a traditional SCADA, but is web based, scalable and has multiple platform support - it can be run on small embedded computers or on large servers and has built in support for many drivers.

Software

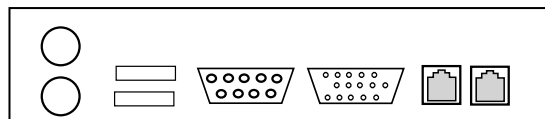

Greyhound Enterprise Server (GHE-01) is used for supervision of large to very large sites or to aggregate all of your Greyhound Servers data to a central access point.

Number of connected GHS	1000
Available logspace	approx. 300Gb, RAID 1

Hardware

Serial ports (RS232)	1 (1-16 USB)
Serial ports (RS485)	0 (1-16 USB)
Ethernet ports	2 x 10/100/1000 MBit
Power supply	100 - 240V, 60-50Hz, 6-3 Amp
Operation environment	10-35 deg C, humidity 8-90%, non-condensing
Mechanical	427 x 178 x 531 mm

Connections

- COM1** - Serial device 0 (RS232)
- LAN1** - Ethernet device 0
- LAN2** - Ethernet device 1
- USB** - For LON, more serial ports etc
